

## Create File Transfer with ACS (IBM I Access Client Solutions)

Open a green screen to the system you want to download the file from

Hit the green DOWN ARROW

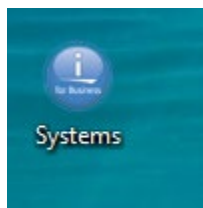

Add the correct file names

Start transfer make sure it works as expected.

File>Save AS>

Put the file in the correct location

If you put this on your desktop you will have an ICON with the Name of your transfer.

Double click on the ICON and you're transfer will be there.

If you want to overwrite the file without any prompting. Click on details.
